

T SERIES UTILITY TRASH PUMPS

Utility Trash Pumps offer the best in lightweight durable performance

Designed to the same demanding specifications as the cast iron Wet Prime Trash Pumps, the Utility Trash Pumps give high performance with the mobility of a lightweight cast aluminum housing. For durability, portability and flexibility, the Utility Trash Pump performs over the long haul with low maintenance for continued service.

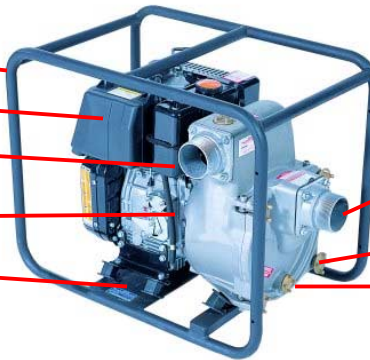

Heavy duty steel protective roll cage carrying frame

Gasoline or diesel engines available

Discharge port

Compact close coupled design

Sub frame with shock absorbers to minimize vibration

Suction port with suction check valve

Quick release levers with hand wrenches for easy removal of clean-out cover without tools

Drain port

Model shown 3T-DLC

FEATURES

- Heavy duty steel protective roll cage
- Self priming
- Lightweight aluminum pump housing
- Large solids handling capability
- Suction check valve
- Flows to 680-gpm and heads to 98-feet
- Volute and impeller are made of cast iron for abrasion resistance and long life
- Mechanical seal has silicone carbide seal faces and is grease lubricated
- Compact close coupled design
- Front pull out design
- Parts are easily replaceable in the field
- Long lasting and durable
- Large clean-out cover with hand wrenches
- Lightweight and portable
- Quick repairs and shorter down times
- Replaceable cast iron volute and impeller
- Replaceable cast iron rubber-lined wear plate
- Replaceable suction and discharge ports
- Economical to operate

APPLICATIONS

- Excavation dewatering
- Solids entrained and sediment laden mixtures
- Sewage transfer
- Booster service
- Liquid fertilizer
- Stand-by or emergency dewatering
- Flood drainage
- Groundwater dewatering
- Water supply from wells or canals
- Filling water trucks and pre-wet operations

Why are there so many suppliers of Utility Trash Pumps?

Utility Trash Pumps are relatively easy to manufacture with simply a small engine and a wet prime trash pump end. Therefore, you will see many "assemblers" of 2, 3, and 4-inch pumps, with varying levels of quality. Usually these pumps are referred to as "throw-away pumps," because once they are riddled with wear, they are thrown away and a new pump is purchased. Utility Trash Pumps have a replaceable volute, housing, impeller, and wear plate. Worn parts can be easily replaced in the field, saving money and time.

In the interest of product improvement, we reserve the right to change specifications without incurring any obligation for equipment previously or subsequently sold. Capacity and Head are shown for comparative purposes. Consult engineering data for exact capabilities.
